Summary:

Experienced frontend developer with expertise in React.js, Next.js, and React Native. Skilled in software lifecycle, UI design, and deployment. Adapts quickly and excels in team settings.

Skills:

Frontend: Javascript, Typescript, Redux, HTML, CSS

Framework: React.js, Next.js, MaterialUI, TailwindCSS, React Native

Other Skills: Figma, Video Editing, Photoshop

Experience:

1. **Frontend Developer at Shopyvilla Developers, April 2022 to July 2023**

    -   I led the team that redesigned the client's flagship products, improving the UI and user experience with React and Redux.
    -   Developed and maintained code, mostly with React and Next, for internal and client websites.

2. **Frontend Developer at Skynox tech, Jan 2020 to March 2022**

    -   I led a team in building a progressive web application with React, improving the mobile user experience and increasing mobile traffic by 35%.
    -   Played a key role in a front-end development team, consistently meeting deadlines and contributing to weekly sprint planning and review meetings.
    -   Integrated RESTful APIs to enhance the functionality and user experience of web applications.

Projects:

1. **Project: EAS (Egypt Taxation Portal)**

    Role: Frontend Development

    Technology used: React.js, Redux, Material-UI

    -   Developed the dynamic front end for Egypt's taxation portal using React.js.
    -   Enhanced user experience and ensured robust state management with Redux.
    -   Engaged in all SDLC phases, demonstrating problem-solving skills and commitment to quality.

2. **Project: Walgreens**

    Role: Frontend Development

    Technology used: React Native, Redux

    -   Led React Native frontend development for Walgreens' web app, integrating APIs and managing state with Redux and Saga.
    -   Streamlined digital pharmacy services, improving operational efficiency and customer engagement.

3. Project: Bravvox

Role: Frontend Development

Technology used: React.js, Redux, Material-UI
- I created the front end of Bravvox's social media platform using React.js, with real-time features and API integration.
- Facilitated a secure, engaging user environment, building a community-centric digital experience.

4. Project: Smart Buckets

Role: Frontend Development

Technology used: React.js, TailwindCSS, Redux Typescript
- I designed the front end of an innovative e-commerce platform using React.js, focusing on API integration and user interaction.
- Empower small vendors to thrive online, delivering scalable and inclusive digital solutions.

5. Project: MindBell

Role: Frontend Development

Technology used: Next.js, Redux, Material-UI
- Developed an interactive front-end for the MindBell ed-tech platform using Next.js.
- Enhanced the learning experience with engaging content and real-time features, enhancing educational accessibility.

6. Project: Bigwig

Role: Frontend Development

Technology used: React Native, styled-component
- I developed the front end of Bigwig's social media app with React Native, including e-commerce functionalities and real-time engagement.
- Created a vibrant online community and novel shopping experience, blending social media with commerce innovatively.

Education:

- B.Tech in Information Technology from College of Technology, Pantnagar, Uttarakhand, in 2019.
- Diploma In Electronics Engineering from K. L. Polytechnic, Roorkee, Uttarakhand, in 2016
- High School From Rajiv Gandhi Navodaya Vidyalaya, Haridwar, Uttarakhand, in 2012
